*"Insider Tips to Make Your Business Run Faster, Easier, and More Profitably"*

## What's New

Given ongoing cybersecurity risks, now magnified by the international situation, it's a good time to remember that despite the best network security we all need to be careful when opening emails, especially those with attachments or hyperlinks. Some of them are very clever and appear to be from your bank, the IRS, etc. and want you to "verify" your account or click on a link. Sometimes you will find typos and grammatical errors in their emails, but the crooks are getting smarter and you can no longer count on them making it that easy.

If you don't have a policy in your company regarding opening emails and attachments, be sure to talk to us about implementing one. We'd be happy to train your employees and make them aware of the risks and the ways we can mitigate them. In the meantime, don't open attachments or click on links unless you're sure they're legitimate. Constant vigilance!

### Our Mission:

To allow customers to focus on completing their mission by delivering right-fit / right-sized / world-class solutions and removing technological barriers to success.

## The IT Services Model Where Everyone Wins – And The One Where You Lose Big

If you're a business owner, there's probably a good chance you spent time figuring out the IT needs of your business. It's not as easy as searching online and picking the cheapest option or the company with the best reviews. The cheap option may not provide the services you need to keep your business at the top of its game, and the best-reviewed business may be too expensive or offer services that are completely unnecessary for your business.

To put it simply, if you want to get the most out of your IT support services, you must do some research. If you haven't spent a lot of time in the world of IT, it can be difficult to figure out where to even begin with your research. If you've found yourself in this situation previously or are preparing to open a new business and are interested in your IT support options, we've got you covered. We've put together the three most common forms of IT support and

explain the benefits and drawbacks of each so you can confidently decide on the best option for your business.

### Managed IT Services

In this option, the IT services company takes over the role of your in-house IT department for a fixed and agreed-upon monthly rate. They'll install, support and maintain all the users, devices and PCs connected to your network on a routine basis. They will even take care of your hardware and software needs for an extra cost. If you're trying to plan for a monthly budget or want routine maintenance and IT support, this option will work wonders for your business.

It's my sincere belief that the managed IT approach is undoubtedly the most cost-effective and smartest option for any business. With managed IT services, your business will be protected from IT-related problems, and they will keep your

*Continued on pg.2*

*Continued from pg.1*

systems up and running. They can prevent common “disasters” such as lost devices, hardware failures, fires, natural disasters and a host of other issues that can interrupt or outright destroy your IT infrastructure and the data it holds.

### Technology As A Service

Another option that might work really well for your business is using a company that offers technology as a service. With these companies, you’ll get everything that managed IT services offer but with the addition of new hardware, software and support. This service ensures that your business is always up-to-date with the newest software and hardware. The greatest benefit of technology as a service is that you’ll avoid the heavy cost of new hardware and software when you need it, but you will be paying far more for the same hardware and software over time. You’ll also need to pay attention to the services they offer to ensure they can provide what you need and that it does not cost extra.

### Time And Materials

Time and materials are often referred to as the “break-fix” method. This essentially means that you pay an agreed-upon hourly rate for a technician to “fix” a problem when something “breaks.” It’s a simple and

**“If you want to get the most out of your IT support services, you must do some research.”**

straightforward way to pay for IT services but often doesn’t work in your favor and can lead you to pay more for basic services.

I would only recommend the time-and-materials approach if you already have an IT team and you need additional support for a problem that your current IT team doesn’t have the time or expertise to handle. Under the break-fix model, the IT company has no immediate need to stabilize your network because they are getting paid hourly. The break-fix model is unable to supply ongoing maintenance and monitoring, which computer networks need to stay secure.

Choosing the right IT option for your business can take time and is certainly not something you want to rush into. Take your time and do your research to find the best option to fit your needs. If you’re unsure of where to even begin – or need some help navigating the sometimes confusing world of IT support – give us a call. We would be glad to help you find the IT support you need.

## Free Report Download: If You Are Considering Cloud Computing For Your Company, DON'T, Until You Read This...

### INTRO TO CLOUD COMPUTING

“5 Critical Facts Every Business Owner Must Know Before Moving Their Network To The Cloud”

Discover What Most IT Consultants Don't Know Or Won't Tell You About Moving Your Company's Network To The Cloud

If you are considering cloud computing or Office 365 to save money and simplify IT, it is extremely important that you get and read this special report: **“5 Critical Facts Every Business Owner Must Know Before Moving Their Network To The Cloud.”**

This report discusses in simple, nontechnical terms the pros and cons of cloud computing, data security, how to choose a cloud provider and three little-known facts that most IT consultants don’t know or won’t tell you about cloud computing that could end up causing you MORE problems and costing you more money than you anticipated. Even

**if you aren't ready to move to the cloud yet,** this report will give you the right information and questions to ask

## Shiny New Gadget Of The Month:

### Desklab Portable Touchscreen Monitor

The pandemic has caused more Americans to start working remotely for their employers than ever before. If you're working from home, you want to make sure you have the best devices available. One of the best things you can add to make your work more efficient in your remote workplace is another monitor, and there are few monitors out right now that can compete with the Desklab Portable Touchscreen Monitor. This monitor gives you an extra screen to work with as well as a 1080p touchscreen. You'll be able to expand your desktop, laptop, phone or tablet to become a second portable touchscreen. The monitor is lightweight and requires no setup, so it's ready to go whenever you need it.

## Building Your Marketing Plan – Where Do You Start?

A strong marketing strategy is one of the most difficult things for new businesses to implement correctly. Many new business owners know how important marketing is but are unsure of how to make their plan successful. My good friend Allan Dib wrote a book titled *The 1-Page Marketing Plan* to teach business owners how to quickly market their businesses.

Allan explains that one of the biggest mistakes new business owners make is trying to ensure that their marketing plan is perfect from day one. It's impossible for your marketing to truly be perfect since it's iterative and needs constant optimization. Instead of trying to make your marketing perfect, just try to get it done. Feedback will tell you what worked and what didn't, and you can adjust your strategy based on that.

Before you can even start planning your marketing strategy, there are a few things you need to figure out first. Before anything else, you need to figure out who your audience is. This will allow you to find a certain niche that will help you build a solid marketing plan. If you try to target everyone as your audience, you'll end up targeting nobody.

*Mike Michalowicz has always believed that he had the formula to success and has proven it on multiple occasions. He is the creator of the book Profit First, which is used by hundreds of thousands of companies across the globe to drive greater profits. Mike is a former small-business columnist for The Wall Street Journal and served as a business makeover specialist for MSNBC. Mike currently leads two new multimillion-dollar ventures as he puts his latest research to the test.*

### Referral Campaign—Don't Miss Out!

Between now and June 30, 2022 we're offering a \$1,000 referral bonus to you or your favorite charity when someone you refer to us signs a minimum 12-month managed service contract! Know anyone who might benefit from our unique combination of managed services and personal IT support? If so, send us their contact information—and copy us on a simple email introduction. That's all it takes! ([bajones@amicustech.com](mailto:bajones@amicustech.com)) 310-670-4962

Furthermore, Allan explains that once you have found your target audience, you need to create a message that resonates with them. Test your ideas on your current customer base, and if you find one that fits, implement the wording into your marketing campaign. Don't try to sell in your advertisements; instead, have them fill out a form or give your business a call.

Once you've found your target audience and crafted your message, you'll need to find the perfect place to broadcast. Through your research in finding your target audience, you should have a general idea of where to publish any marketing. Don't be afraid to use multiple platforms to reach a wider audience.

Allan is a best-selling author and an extremely successful marketer. He's helped over 500,000 businesses achieve rapid growth and (in my opinion) is one of the best minds in the business. If you're needing more marketing advice from one of the masters of the craft, check out his book, *The 1-Page Marketing Plan*.

## ■ Meta-WHAT?! What You Need To Know About The Metaverse

In 2014, Facebook purchased Oculus, a company that designs and produces virtual reality headsets and games. This would end up being the first step in Facebook's change to their new identity: Meta. Recently, Mark Zuckerberg, the founder of Facebook, unveiled the Metaverse with the goal of creating an "immersive Internet experience" that he hopes will lead to a "world of endless, interconnected virtual communities."

This idea would essentially allow people to meet with each other, play games and even work by using augmented reality glasses or

virtual reality headsets. Ideally, people will have virtual office spaces where they can communicate with coworkers and virtual homes where they can host friends for get-togethers. The biggest concern with Meta is privacy. If people are living their lives in a virtual world, how will the information they share be protected? Only time will tell how Meta handles the privacy challenges of the Metaverse, but it's certainly an exciting time in the world of virtual reality.

## ■ It Isn't Luck, It's SEO - Improve Your Conversion Rates Using SEO

Search engine optimization (SEO) and conversion rates go hand in hand. SEO helps bring people to your website,

but conversion rate optimization (CRO) helps make those visits more meaningful. If you aren't getting the desired conversion rates for your website, there are a few tips you can implement to get more from your SEO and CRO.

- **Speed Up Web Page Load Times:** If your website does not load within three seconds, there's a good chance that customers won't wait for your site to load.
- **Improve Your Visuals With Creative Designs:** You want your website to grab a user's attention and encourage them to click through the site.
- **Utilize Videos And Visual Aids:** If users are not staying on your website for a long period of time, add some videos. Users are more likely to stay on your site if there are things for them to watch or look at.
- **Use Strong Calls To Action:** A call to action is a great way to connect with your customer base and will make it easier to track the return on your investments.

## Who Else Wants To Win A \$25 Gift Card?

You can be the Grand Prize Winner of this month's Trivia Challenge Quiz! Just be the first person to correctly answer this month's trivia question and receive a \$25 gift card to Coffee Bean & Tea Leaf. Ready? Call us right now with your answer!

Which video game franchise has collectively sold the most copies?

- a) Madden NFL
- b) Mario
- c) Grand Theft Auto
- d) Pokemon
